

Win-Win-Win Projects

The Sri Lanka Wildlife Conservation Society (SLWCS) is an international non-governmental organization that was founded in 1995 to develop a new paradigm for wildlife conservation and sustainable use of biodiversity in Sri Lanka. The SLWCS model is an inclusive strategy that gives consideration to environmental protection, integrated or holistic development that is sustainable, poverty alleviation, social mobilization, decentralization, bottom-up planning, mainstreaming gender, and basically sustaining more with community resources. In 2008 the SLWCS received a UNDP Equator Initiative Prize, which honors community-based projects that represent outstanding efforts to reduce poverty through the conservation and sustainable use of biodiversity.

With headquarters in Colombo, field offices in the North Central and Eastern Provinces and an international network of expert specialists, the SLWCS provides superior consulting services to investors in the tourism, agriculture, energy, environment, environmental education, and manufacturing industries serving both the domestic and international sectors. SLWCS brings a fresh and innovative approach to consulting services, acting as a liaison, bridging sustainable development concepts with investor goals and objectives. Our goal is to exceed the expectations of every client by offering our vast store of knowledge, experience and technical capacity, outstanding customer service, increased flexibility, and greater value, thus optimizing the benefits to the client as well as to local stakeholders and the environment.

Our competent staff are distinguished by their functional and technical expertise combined with their hands-on experience, thereby ensuring that our clients receive the most effective and professional service. As experts in environmental conservation, sustainable development and GIS mapping and analysis, SLWCS is involved in every stage of project development, from design, implementation to completion offering continual functional and technical support. Our extensive skills encompass all aspects of implementation and operation of activities that range from designing surveys to gathering relevant data and data analysis to support investor and business requirements, to conducting stakeholder meetings, mapping, GIS analysis and ensuring community buy in. Typically, we are on-site at the project locations providing functional and technical support, and resolving and troubleshooting issues that arise.

Unlike other organizations, SLWCS possesses operations experience working in a wide range of geographical areas in Sri Lanka, including in the conflict zones, for more than 7 years. Our staff is well versed in all aspects of gathering information, providing expert services and implementing and

managing projects from budgeting to productivity. We pride ourselves on our proven track record for effectively designing, implementing, administering and managing some of the longest operating sustainable conservation and development initiatives in Sri Lanka. This is due to our ability to be innovative and think "outside-the-box" when the need arises or when faced with challenging situations. In addition, SLWCS has experience of providing services to several international organizations and on-site program support for overseas projects. In order to meet the individual needs of clients, SLWCS maintains a wide range of qualifications. We excel in managing databases, forms, and reports. Our extensive knowledge base entails the use of GIS technology for project design, development, implementation, operations and for post project monitoring and evaluation. At SLWCS, we continually expand our knowledge and services to assist clients achieve their goals and objectives, while ensuring a cleaner and healthy environment. Exceptional functional and technical expertise coupled with extensive knowledge and experience in sustainable development and conservation make the Sri Lanka Wildlife Conservation Society the ideal choice as a consulting firm to support your investment for sustainable development.

Services, Experiences & Results

Services	Experiences	Results
Project Design, Development & Budgeting	• Project Implementation, Operations, Management, Monitoring & Evaluation. • Workshops. • Ecological assessments. • Agro-forestry. • Eco-agriculture. • Home Garden Development. • Research.	• Organized the first human elephant conflict workshop for the IUCN. • First post-tsunami ecological assessment, monitoring and evaluation. • 100 acres agro-forestry project in Eastern Province. • 65 alternative agriculture projects in Wasgamuwa. • 640 home gardens developed in the Eastern Province including provisioning agro and tube wells. • Conducted post-tsunami livelihood recovery program.
Surveys & GIS Specialists	• GIS based Socio-Economic and Biodiversity surveys. • PRA/RRA. • IEEs, EIAs, SEAs and PIAs • Rapid Ecological Resource Utilization (RERU) and Comprehensive Rapid Evaluation System (CRES) survey techniques.	• In-depth surveys designed to improve project planning and implementation. • Assessment of Seruwila and Lunugala for UNESCO World Heritage nomination. • Surveys conducted over 30% of Sri Lanka, and in Sumatra, Indonesia.
Disaster and Risk	• Disaster risk reduction	• Established the first

Management	through Human Elephant Conflict (HEC) Mitigation (estimated cost of agriculture losses due to HEC in Sri Lanka alone is US\$ 10 million per annum).	community-based projects to resolve HEC in 1997. • Increased agriculture production by 92% by eliminating crop losses. • Initiated Sri Lanka's longest continuously operating electric fences. • Projects conducted at the request of the Department of Wildlife Conservation and Mahaweli Authority of Sri Lanka. • Currently developing innovative technology to improve operational efficiency. • Winner of 2008 UNDP Equator Initiative Prize and 2009 Whitley Fund for Nature Associate Award.
Environmental	• Climate change.	• Conducting community and ecological surveys to establish a baseline database for climate change information and monitoring.
Environmental	• Sustainable Energy. • Natural Resource Management.	• Solar powered electric fences to mitigate HEC. • Buffer zone enrichment. • Sustainable livelihood development.
Environmental	• Conservation Education and Awareness	• Conducts a Ministry of Education approved outdoor environmental education program. • Developing an environment awareness program for the East at the request of the Central Environmental Authority and Ministry of Environment & Natural Resources.
Agriculture	• Eco-agriculture. • Animal husbandry. • Alternative crops.	• Habitat enrichment projects • Propagated 500,000 plants.

		• Distribute livestock to farmers. • Develop alternative buffer crops to increase rural incomes and mitigate conflict with wildlife.
Tourism Development	• Concept design & development. • Program development & marketing. • Site development.	• Experiential travel & nature-based tourism Programs. • Developed high-end luxury tours for US clients. • Organized promotional events in the US. • Partnerships with 7 major experiential travel and ecotourism operators
Media	• Media production for promotional and publicity needs.	• International network and local knowledge ensures media is produced to target specific markets. • Documentaries. • Brochures. • Information packets
Logistics	• Film location services and logistics support. • Field research. • Ecological assessments. • Wilderness expeditions. • Conferences, workshops and symposia.	• Provided services & logistics to most major international television networks. • Provided logistics for post-tsunami ecological assessments. • Organized expeditions for US clients. • Organized national and international forums.
Information and Data	• Data collection, storage and dissemination of information. • Web design. • Development of Internet based platforms for information sharing.	• www.Asianelephant.info • Databases, image banks, stock footage, maps, reports and reference library. • Data coverage of 30% of Sri Lanka which can be used for project planning and implementation.

Personnel & Capacity

Qualified, knowledgeable and highly experienced staff

GIS experts knowledgeable in advanced GIS analysis

Competent financial and accounting team

Efficient logistics team

Network of international expert consultants based in the USA, Europe, South & Southeast Asia and Australia

Infrastructure

Head offices in Colombo.

International Offices in New York/New Jersey (USA) and Victoria (Australia).

Regional offices in Sri Lanka.

- Project Office, Wilgamuwa, Matale District, Central Province.
- Project Office, Deegavapiya, Ampara District, Eastern Province.

Equipment & Resources

5 Four-Wheel Drive Vehicles, Boats, Computers, GPS units and related infrastructure.

Original licensed ArcGIS INFO, Google Earth Pro, GIS software and SPOT imagery.

Computer and Internet hardware.

Wireless and satellite equipment for efficient field communication.

Extensive research and reference library.

Investment Opportunities

Project & Sector	Location/Experience	Description	Investment Quantum (Required)[Spent]
Eco-agriculture and nature based tourism	Ampara - 300 acre property located close to Oluvil harbor nearby to Ampara town. Trincomalee - 300 acre property located in Kuchaweli. Both properties have perennial surface water sources.	Both properties can be developed for Eco-agriculture and low impact high-end niche market tourism or nature based or eco-tourism.	US\$ (350,000)
Climate Change/Carbon Credit/Small Holder Livestock Development	Ampara - 500+ acres of privately owned land plots located in the Lahugala and Pottuvil Divisional Secretary Divisions.	To establish cooperative carbon-credit projects and small holder livestock development as sustainable livelihoods.	US\$[400,000.00]
Sustainable Tourism and Natural Resource Conservation	Ampara -10+ acres of beach front land surrounded by forest	To establish a coast and marine resource conservation based	US\$120,000 [US\$15,000]

	located in Panama in the Lahugala Divisional Secretary Division. Trincomalee - 15+ acres of beach front land located in Nilaweli in the Trincomalee Divisional Secretary Division.	"nature/culture experience" tourism venture incorporating sea turtle & mangrove conservation projects, HEC mitigation, coastal community development, elephant & leopard safaris, whale & dolphin watching, wilderness trekking and exploration of historical sites.	
Experiential Travel and Tourism Programs	SLWCS has access to some pristine and remote locations in the North Western, North Central, Central, Uva and Eastern Provinces in which the Society has projects.	Niche market tourism programs to provide a "hands on" experience of the wilderness and to participate in the efforts to conserve the last wild places of Sri Lanka. Special and customized programs that will provide small groups real experiences of the country through its wildlife, ecology and history by living and traveling with local experts.	US\$80,000 [US\$130,000]. For internet and worldwide tourism promotion events to establish a steady flow of clients.
Film location services and logisitcs support for international film crews and photo shoots	The SLWCS has over 12 years experience providing location services and logistics support to international film crews and photographers	Establish a streamlined and seamless service-oriented company to provide location services and logistical support for international narrative and documentary film production companies.	US\$80,000 [US\$130,000]. For Internet marketing and participate in worldwide promotional events to establish a steady flow of clients.
Promotional film about the Sri Lanka tea industry	Greener Media is a multimedia production company based in Brooklyn, New York. Whether its feature length	Hosted by an energetic female host, with an insider knowledge of tea and tea production. We begin in the high hills of Sri Lanka, where we learn about the history of	US\$50,000. For complete production of film.

	documentaries, web series, or short form ads/PSA's, our award winning team knows how to convey your message with dynamic media. We have made a commitment to produce environmentally and socially conscious media, and also to begin taking steps to lessen the footprint of our production process.	Ceylon Tea and how the country became the worlds foremost exporter. We then discover how tea is cultivated and processed today, follow the export of the commodity to London where there is a rich culture and history of consuming tea. We explore some of the famous tea institutions and learn about some of the traditional ways of preparing and drinking it. The concept is based on a show called Fresh Brew, a journey track coffee from the bean to the cup.
